If she don't wish to hear?" "No, my dear; not when you see them - Danbury News,

Nevada State Zoarnal. A large number, of our citizens have money invested in the mines on the Comstock. Therefore we need offer no spology for reproducing in our columns an article from the Gold Hill News of Thursday evening last, showing the present situation of affairs: "The week closes with encouraging prospects along the entire line of the Comstock, and stocks firm at a strong advance over last week's quotations. This improved first expected, and promise a fine ment is generally believed to be yield of good ore for the future. based upon the faith that the people have in the development of new levels in several of our leading mines during the next two or three months to come, and a gradual easing of the tightness of the money market. The ore developments on the 1400 foot level of the California, going north, far exceed former expectations, and is adding greatly to the already magnificent developments of that mine. The Sierra Nevada is running two drifts on the 700 foot level; one north and one south in entirely virgin ground, which are liable almost any day to make valuable ore developments, and the Utah on the north oud has just got its new and powerful machinery ready for a thorough and rapid development of the lower levels; while on the south end, the Overman has started her pumps at the 1000-foot station, and will undoubtedly have her shaft drained in a day or two more, ready to resume the development of the fine ore prospects, opened on the lower levels a few months since. The Crown Point will also soon have a new level ready to open, with almost a surety of finding ore; while the yield of the Belcher is gradually on the increase; and the prospects of ore on the 1840foot level of the Yellow Jacket is better than for the past two years. The Imperial-Empire are just getting their 2000-foot level in shape for a thorough prospecting, and the Halo & Norcross are ofening a sta-Hale & Norcross are offening a sta-tion at their 2200-foot level. The line are much richer than was exyield of the Consolidated Virginia is already \$100,000 in excess of that of last month at the same date, so that, taken altogether, there is certainly nothing discouraging in the future

/ тик сометоси.

NOTWITHSTANDING the larger acreage of grain sown in California this year the bulk of the crop is known to be considerably less than that of last year—how much less may be judged when we state that the estimated consumption of grain sacks by the present crop is 12,000,000, whereas 15,000,000 sacks were required for the crop of 1874. The lack of rains in April had a very material effect in reducing the yield of grain throughout the State, from what was promised in March, when it was thought that 6,000,000 more sacks would be needed than now seems probable.

An article of the new constitution of Nebraska, provides that at any election of members of the legislature immediately preceding a vacancy in the United States Senate, from person for the office of United States Senator, and such votes is to be canvassed as other votes.

TELEGRAPHIC advices from Arizona announce an astonishingly rich discovery of silver near Florence in that Territory. Examples are contagious, and parhaps Arizona is going to follow in the wake of Nevada with a nig bonanza.

# NEVADA MINING MENS.

Prom the Bold Hill News of Thursday, J. Ophir.

Daily yield, 800 tons of ore. It is the intention to continue this amount for about a week longer, in order to get a six weeks' supply of ore on hand for the mill, when it is the intention to shut down the mine for the purpose of repairing a portion of the shaft and putting in a new gal-lows frame. The ore breasts recent-ly opened on the 1500 and 1600-foot levels are much better than was at Belcher.

Daily yield, 500 tons of ore. The ore breasts still promise a goodly yield, and the openings on the 1500foot level are about sufficiently adrope layer are another administrative ac-yranged to begin the extraction of one from that portion of the mine. The opening drifts of the 1600-feet level are steadily advancing, but have not yet reached the ore vein. The air shaft is nearly completed to the 1200-foot level. The mills are doing good work and everything is looking bright and prosporous.

Crown Polat.

Daily yield, 500 tons of ore. The ore breasts are looking well and yield ing the usual amount of ore. Preparations are being made for a complete exploration of the 1600-foot level. The main east drift on 1700-foot level is in 115 feet, the face still in hard blasting ground. This drift will have about 66 feet yet to run to intersect the ledge.

Отогналь

The pump at the 1000-foot level was started up yesterday, and is rap-idly draining the water below that point. Everything is now in fine working condition, and in a day or two more it is expected that the shaft will be free from water, when work vill be resumed on the different levels with all the vigor possible.

Mexican

Sinking the winze below the 1465-foot level affords no change or im-portance worth noting. When the foot level anorus no change of the portance worth noting. When the Ophir shuts down, which will probably be about the 21st of July, work will also have to be stopped in the Mexican, as the repairing of the shaft will necessarily interfere with the hoisting of the rock.

California

The ore developments on the 1400peeted, adding greatly to the value of the mine. Sinking the C. & C. shaft is making splendid progress. The erection of the new mill is fast getting in shape for a swift and speedy completion.

Consolidated Virginia.

Daily yield, 600 tons of ore. mine is looking splendidly throughout all the levels continuing their regular yield of rich ore, without any indication whatever of exhaustion.

A New York man was admiring a young lady's hair the other evening. Miss Dennison, please give me one hitle curl ; just one, won't you?" he picaded. "Couldn't think of it. Mr. Mortimer—couldn't think of it for a moment," raplied the young lady briskly, "those curls cost me a doilar apiece."

Turne is no strength to the Mining Share market. The least advance brings out more stock than the, market can take, and there is but one result. Day before yesterday there was an upward tendency; yesterday most of the advance was lost. As a whole, there is more business, and those who have long been waiting for a rise feel encouraged by that

Sport.-There ought to be considerable sport out at the Pair grounds this afternoon. Bundle-and-Go and Overland Pat are pretty evenly matched and both have good records. No gateage fee will be exacted from those who desire to witness the race. The race is half mile heats, two in three, for a purse of \$190.

TRAVEL from the East is again increasing; all trains going West on the Pacific roads are crowded. But few Californians or Nevadans are going East; and a great many are waiting for the centennial excursion trains of next year, which it is to be hoped will afford an opportunity of crossing the continent at a little more than half the regular rates.

SAVAGE ELECTION .- A special telegram to the Journal says: At a meeting of the Savage Mining Company, hold in San Francisco Thursday the following officers were elected: President, Geo.
